

Weekly marketing report

DecidrOS · Sugarworks · Partnership

8–14 Jun 2026 · Prepared for CMO

LEAD FUNNEL

Steady week, quality concentrated in DecidrOS. 266 new contacts (182 on the qualified track + 84 newsletter subscribers). DecidrOS converted at ~72% to MQL while Sugarworks lagged at 19%. Two opportunities progressed — Heath Hebenton (Finextra Wealth) and Lori K (LTAK) — both from the Facebook "AI Roadmap" demo campaign in Australia.

SQL BY PRODUCT (MQL+)

MQL+ by product. DecidrOS ~72% MQL rate (62 of 86 ex-sub). Sugarworks 19% (18 of 94 ex-sub) — lead quality is the watch item this week.

WEEK-ON-WEEK TREND

	WK 23	WK 24	TREND
Contacts (ex-sub)	182	182	flat
MQL+	99	85	-14%
SQL+	3	4	↑
Opportunities	2	2	flat

Only Wk 23–24 shown: the HubSpot org was created 20 May 2026, so earlier weeks reflect setup/import, not organic flow.

PLATFORM	SPEND	LEADS	COST / LEAD	MQL+	COST / MQL
Facebook	\$12,746	180	\$71	52	\$245
LinkedIn	\$13,179	29	\$455	18	\$732
Google (Paid Search)	\$2,839	—	n/a	—	n/a
Total paid media	\$28,764	209	\$138	70	\$411

Google drove 3,477 clicks / 2,538 GA4 sessions this week but no HubSpot-attributed leads — paid-search lead capture is the gap. LinkedIn costs ~6× Facebook per lead (\$455 vs \$71) but delivers higher MQL quality.

KEY OBSERVATIONS

- 1 DecidrOS quality is strong — ~72% MQL rate.** 62 of 86 qualified-track DecidrOS contacts reached MQL, with 5 SQL+ and both opportunities. The DecidrOS funnel is healthy.
- 2 Sugarworks lead quality is the watch item — 19% MQL rate.** 76 new Sugarworks leads but only 18 reached MQL and none progressed to SQL. Audience / targeting review recommended.
- 3 "AI Roadmap" demo campaign converts at 100% MQL.** Every demo-request lead from this Facebook AU campaign qualified, and it produced both opportunities (Heath Heberton, Lori K). Highest-intent source this week.
- 4 LinkedIn out-qualifies Facebook.** LinkedIn 62% MQL rate (18 of 29) vs Facebook 40% (52 of 180). LinkedIn is the cleaner-fit, lower-volume channel; Facebook is the volume engine.
- 5 FB Singapore AI Readiness underperforms — 28 contacts, 11% MQL.** Consistent with low-fit geo targeting. Audience / geo review and possible budget reallocation worth considering.
- 6 Channel concentration: Paid Social is 79% of volume (209 of 266).** Only Direct (29) and Offline (28) contribute otherwise. Diversifying source mix would reduce single-channel risk.
- 7 Paid media: \$28.8k spent, \$138 blended cost / lead.** LinkedIn runs ~6× Facebook per lead (\$455 vs \$71); Google spent \$2.8k with no HubSpot-attributed leads — paid-search lead capture is the clearest efficiency fix.
- 8 Attribution gap: 192 of 266 contacts have no country.** Mainly Facebook Lead Ads. Capturing country on-form would sharpen geo reporting.

LIVE LAST WEEK FROM MARKETING

PENDING INPUT

Narrative — fill in what marketing shipped last week (case studies, blogs, newsletters, partnership assets, download counts). Not derivable from HubSpot/GA4.

WHAT'S NEXT THIS WEEK

PENDING INPUT

Narrative — list this week's planned launches, events, and campaigns.

 **PENDING INPUT**

Q2 targets: 2,000 MQL / 600 SQL. Actuals pending an agreed source — create-date counts are unreliable (org created 20 May 2026; a 25 May bulk migration of ~10k historical records inflates raw totals to 2,301 MQL / 371 SQL, while June-organic is only ~184 MQL). Define a HubSpot saved report that isolates genuine Q2 marketing-generated MQL/SQL, then fill in actuals.
